

Simplify workflows and improve workplace safety

BLR's Audits and Inspections tool

In 2021, the National Safety Council (NSC) estimated the total economic cost of work-related deaths and injuries was \$167 billion.* Completing regular safety audits and inspections is integral to identifying potential hazards, keeping workers safe, and reducing facility liability. BLR's Audits and Inspections tool can save you from wage and productivity losses by digitizing the audit process and helping you stay on top of your obligations across all sites.

Key features:

- ✓ Build, complete, and track any audit, inspection, survey, or checklist from one centralized location
- ✓ Schedule and assign recurring audits to make sure they're completed fully and in a timely manner
- ✓ Integrate with the CAPA tool to automate audit processes and trigger action items
- ✓ Review, approve, or deny audits swiftly, ensuring adherence to your safety standards
- ✓ Complete and access audits from the office or the field with our streamlined, stand-alone mobile application

Key benefits:

- Improved workforce safety
- Fewer accidents, injuries, and illnesses
- Fewer legal claims
- Less turnover
- Improved employee morale
- Better decision-making

Simplify your auditing procedures, stay on top of your compliance obligations, and ensure your work environment is safe and healthy with BLR's Audits and Inspections tool.
